Internet Start-up Company

Lebanon

Dear Sir/Madam,

I am writing to you to express my interest and motivation in completing an internship in your institute. I have heard about it from my university's career and placement services, and found it really interesting.

I am a dynamic 21 years old man who really enjoys working and learning new skills. I am currently a senior year student completing a Bachelor of Science in Computer Science at the American University of Beirut, Lebanon, and expect to graduate in 2014. But I believe that I need to develop other skills that I can gain only through a good internship since I like to be part of the work environment, and get used to it before graduation.

Apart from my regular studies, I have been in the work-study program of my university which increased my sociability and communicational skills. Also, as a research assistant, I have developed good skills about different software used in Educational institutions, and keep on discovering new tools. I most enjoy programming especially with object oriented languages. I worked on different projects in university; therefore I am very excited to upgrade the skills I already developed, and gain others as well.

My resume, enclosed herewith for your reference, contains additional information on my skills. I would greatly appreciate the opportunity to discuss my candidacy with you. I can be available for an interview any time at your convenience.

Thanking you for your attention,
Yours truly,

Hussein Hassoun
